The original super-durable plastic

PRO - \$\$ - Grip: ★★★ - Life: ★★★★★
Durable yet grippy with increased glide

STAR - \$\$\$\$ - Grip: ★★★ - Life: ★★★★★
Champion durability with improved grip

IT'S ALL IN THE NUMBERS

Speed - in green

Speed is the ability of a disc to cut through the air. Speed ratings are from 1 to 12. Discs with higher numbers are faster, but require more power to achieve their true potential. Lower numbers offer better distance control.

Glide - in red

A higher glide number means the disc can ride the air better. New players should look for discs with more glide. A disc rated 6 has the most glide. Choose low glide numbers for throwing into a headwind.

Turn - High Speed Turn - in blue

The tendency of a disc to bank right (for RHBH* throwers) early in the flight. A disc rated +1 is most resistant to turn over. A disc rated -4 will turn the easiest.

Fade - Low Speed Fade - in yellow

All discs tail off in the same direction (left for RHBH* shots), but some will "hook" harder than others. A disc rated zero will finish the straightest while a 5 will hook the hardest.

Speed 11 & 12

Max
Supremely overstable. Not for the faint of arm.

11 3
0 5

Star

XCaliber
A meaty Destroyer. For windy situations.

12 5
